Provider Taxonomy Changes for HIPAA 837 Claims Processing

Electronic Billing of
Third Party Insurance Claims

27 October 2003

ACS Federal Healthcare, Inc.

Purpose

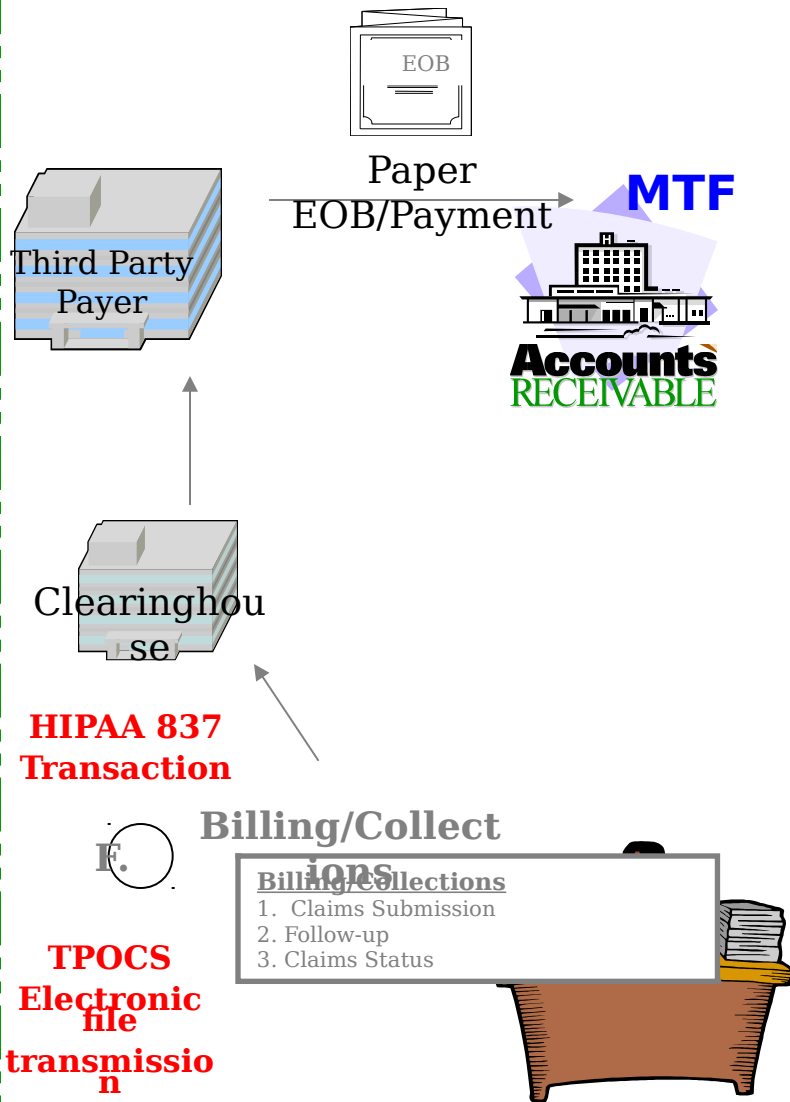

The Purpose of the HIPAA 837 Claims Processing training is to ensure that all the required data for the X12 837 Professional and Institutional Claims are provided to TPOCS. This will provide compliant 837 transaction for claims processing.

TPOCS is the MHS standard system for the processing of third-party claims for outpatient services, and supports billing processes. TPOCS sends the data captured to the clearinghouse to allow electronic billing for claims.

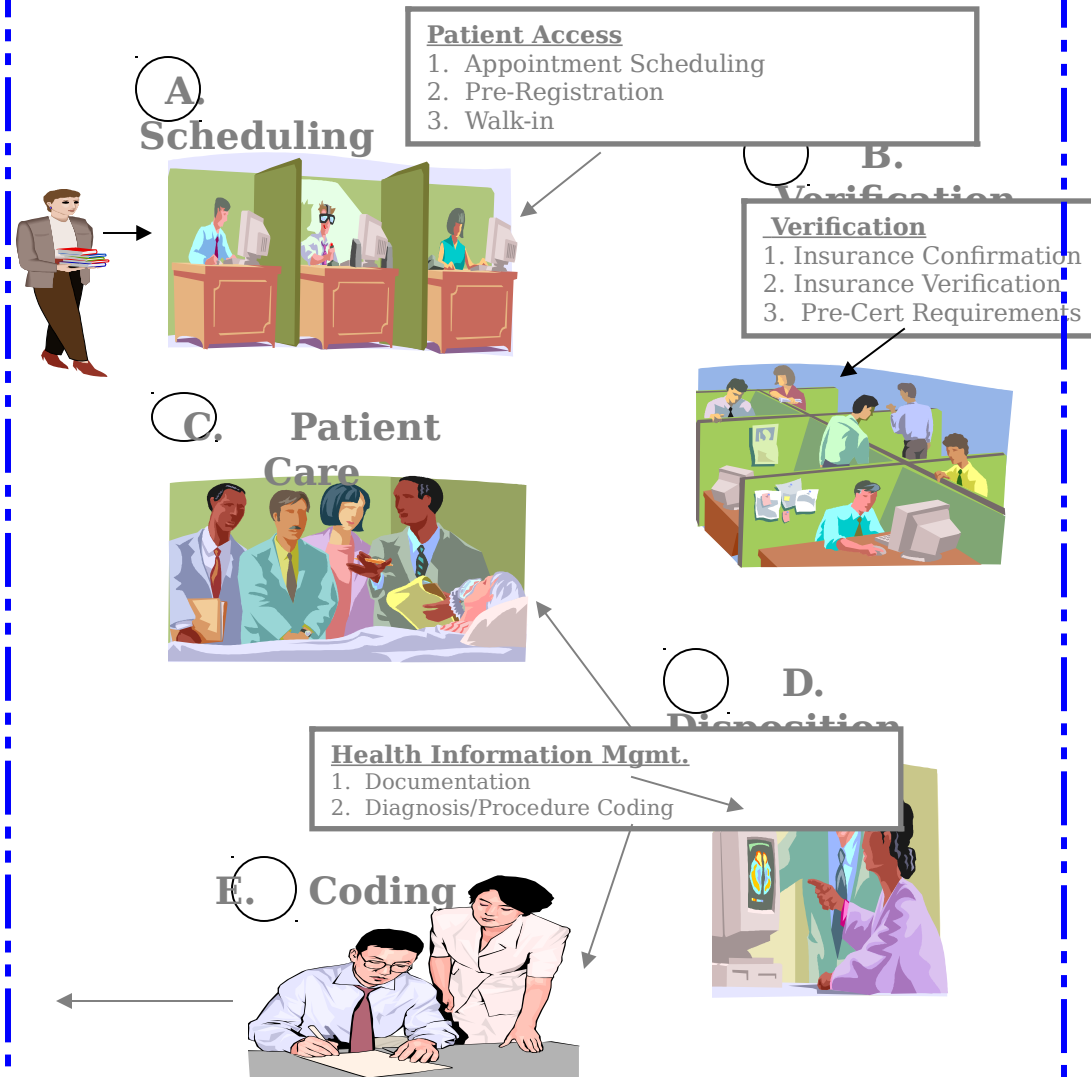

Benefits of Electronic Billing

- ◇ Standardizes Data Requirements & Format
- ◇ Increases Patient, Insurance, Coding and Billing Data Accuracy
- ◇ Increases security of Patient Health Information
- ◇ Eliminates costs and delays associated with paper documents
- ◇ Reduces initial claims rejections and increase collections
- ◇ Shortens waiting periods for reimbursement to MTF

MTF Revenue Cycle

TPOCS

CHCS /ADM

Overview Business Process Issues & Concerns

- ◇ CHCS Data Quality Requirements
 - Provider Files-Provider Taxonomy

Overview Data Requirements from CHCS Users

- ◇ Information Required to Allow Electronic Billing on
p. TPOGS with 837 HIPAA Compliant Claims Processing Data Quality Requirements
- Provider Files-Provider Taxonomy

HIPAA II Taxonomy Phase II Project Overview

- ◇ The CHCS System has been enhanced to store multiple HIPAA Provider Taxonomy values in the HIPAA Provider Taxonomy Code field of the Provider file.
- ◇ The CHCS Data Administration Provider Enter/Edit screen has been modified to permit users to designate a Primary HIPAA Provider Taxonomy value for a provider.
- ◇ The Provider ASCII file download to IFOCS (Third Party Outpatient Collection System) has been modified to reflect multiple HIPAA Provider Taxonomy values for a provider and to designate the Primary HIPAA Provider Taxonomy value and allow for appropriate billing.

ADM Priority I Phase II Overview (use of HIPAA Provider Taxonomy III table)- summer 04

- ◇ Residents have been mapped to their respective specialties on the taxonomy table, thus associating GME with a CMAC Provider
- ◇ Residents will use Specialty Code (Applicable to Residents with CS Specialty Code) in the Provider field in ADM and Supervising Provider will occupy second field (residents require supervising provider since GME is mapped to a non privileged provider status)
- ◇ ADM Priority I Phase II, upon conversion, will trigger all billable events involving residents (for prior x months) to be pushed to TPOCS and be billed. Billers will see a one time higher volume of resident billable events upon conversion.)

Ambulatory Data Module Overview of Changes - Provider

*If the
informatio
n applies,
it needs to
be
completed
to allow
electronic
billing*
